*No biological exposure limits noted for the ingredient(s).*

**Biological limit values**

*Zirconium silicates (zircon sands) contain trace amounts (106-120 pCi/g) of naturally occurring radioactive uranium and thorium. Overexposure by inhalation to respirable dust containing uranium and thorium may cause lung cancer. Eye contact with the dust may cause eye irritation. Measurements made by Dupont during the use of a similar mineral sand indicated the observance of the 5 mg/m³ OSHA PEL for respirable dust and/or the PEL for quartz ensures the user is below the exposure limits established for uranium and thorium. No LD₅₀ or LC₅₀ can be found for zircon sand.*

**Exposure guidelines**

*Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.*

**Appropriate engineering controls**

*Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits.*

**Individual protection measures, such as personal protective equipment**

**Eye/face protection**

*Wear safety glasses with side shields (or goggles).*

**Skin protection**

**Hand protection**

*Wear appropriate chemical resistant gloves.*

**Other**

*Wear suitable protective clothing.*

**Respiratory protection**

*Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits.*

**Thermal hazards**

*Wear appropriate thermal protective clothing, when necessary.*

**General hygiene considerations**

*Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.*
