1. Identification of the chemical and information about the manufacturer or supplier

1.1 Identification of the chemical products

1.1.1 Technical name
MIZZOU CASTABLE PLUS; MIZZOU CASTABLE PLUS W/F; MIZZOU CASTABLE PLUS H

Other means of identification
Brand Code
5976, 454B, 4622, 715C

1.1.2 Recommended use of the chemical and restrictions on use

Recommended use
For Industrial or Professional Use Only

Limitations on use
DO NOT INGEST. KEEP MATERIAL AWAY FROM CHILDREN AND ANIMALS TO PREVENT ACCIDENTAL INGESTION. Avoid dry cutting, blasting, or dust generation.

1.2 Manufacturer/Importer/Supplier/Distributor information

1.2.1 Manufacturer
Company name
HarbisonWalker International

1.2.2 Address (post and legal)
1305 Cherrington Parkway, Suite 100
Moon Township, Pennsylvania 15108
United States

Website
www.thinkHWI.com

Contact person
Product Safety Specialist

1.2.3 Telephone, including Emergency consultations and time limits

Telephone
General Phone: 412-375-6600

Emergency phone number
CHEMTREC 24 HOUR EMERGENCY #
1-800-424-9300

1.2.4 Fax

1.2.5 E-mail
sds@thinkhw.com

2. Hazard(s) identification

2.1. Hazard identification of chemical product as a whole (classification according to GOST 12.1.007-76 and GHS)

Classification according to GOST 12.1.007-76
None, the product is a mixture.

GHS classification
Physical hazards
Not classified.

Health hazards
Carcinogenicity Category 1A
Specific target organ toxicity, repeated exposure Category 2

Environmental hazards
Not classified.

2.2 Labeling elements in compliance with GOST 31340-2013

2.2.1 Signal word
Danger

2.2.3 Hazard statement
May cause cancer. May cause damage to organs through prolonged or repeated exposure.

Precautionary statement

Prevention
Do not breathe dust.

Response
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Get medical assistance if you feel unwell. Call a POISON CENTER/doctor if you feel unwell.

Storage
Store locked up.

Disposal
Dispose of contents/container in accordance with local/regional/national/international regulations.

Other hazards
None known.
Supplemental information

Users should be informed of the potential presence of respirable dust and respirable crystalline silica as well as their potential hazards. Overexposure to the respirable dust of crystalline silica (quartz or cristobalite, less than or equal to 5 microns in size) may lead to silicosis in humans, which is a progressive and irreversible lung disease. Appropriate training in the proper use and handling of this material should be provided as required under applicable regulations.

3. Composition/information on ingredients

3.1 Information on product as a whole

3.1.1 Chemical name (IUPAC)
MIZZOU CASTABLE PLUS; MIZZOU CASTABLE PLUS W/F; MIZZOU CASTABLE PLUS H

3.1.2 Chemical formula
Al6O13Si2 (1302-93-8), O2Si (14464-46-1), O2Si (14808-60-7)

3.1.3 General description of the composition (taking into account the brand assortment; preparation method)
Not applicable.

3.2 Components

Crystalline silica may be present at low concentrations; most of this is encapsulated in the coarse aggregate or as part of the clays or sands.

4. First-aid measures

4.1. Observed symptoms

4.1.1 In case of exposure via inhalation
Dust may irritate respiratory system.

4.1.2 In contact with skin
Dust or powder may irritate the skin.

4.1.3 In contact with eyes
Dust may irritate the eyes.

4.1.4 In case of exposure via ingestion
Expected to be a low ingestion hazard.

4.2 First-aid measures to be provided to victims

4.2.1 In case of exposure via inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

4.2.2 In contact with skin
Wash off with soap and water. Get medical attention if irritation develops and persists.

4.2.3 In contact with eyes
Do not rub eyes. Rinse with water. Get medical attention if irritation develops and persists.

4.2.4 In case of exposure via ingestion
Rinse mouth. Get medical attention if symptoms occur.

4.2.5 Contraindications
Not available.

General advice
If you feel unwell, seek medical advice (show the label where possible).

5. Fire-fighting and explosion safety measures and means

5.1 General characteristics of fire-explosion properties
Not available.

5.2 Fire-explosion indicators
Not available.

5.3 Combustion and/or thermal destruction products and hazards arising from these
Not available.

5.4 Recommended extinguishing media
Use fire-extinguishing media appropriate for surrounding materials.

5.5 Forbidden extinguishing media
Not available.

5.6 Special protective equipment for firefighters
Not available.
5.7 Specific extinguishing methods

Not available.

6. Accident and emergency prevention and response measures and their consequences

6.1 Measures to prevent harmful effects on people, environment, buildings, constructions, etc. in case of accidents and emergencies

6.1.1 General required actions in case of an accident or emergency
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe dust. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

6.1.2 Personal protection equipment in case of the accident
Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2 Procedures for the elimination of accidents and emergencies

6.2.1 Procedures in case of leaks, spills, splashes
Not available.

6.2.2 Actions in case of fire
Methods and materials for containment and cleaning up
Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Collect dust using a vacuum cleaner equipped with HEPA filter. Stop the flow of material, if this is without risk.

Large Spills: Wet down with water and dike for later disposal. Shovel the material into waste container. Following product recovery, flush area with water.

Small Spills: Sweep up or vacuum up spillage and collect in suitable container for disposal.

Never return spills to original containers for re-use. Put material in suitable, covered, labeled containers. For waste disposal, see section 13 of the SDS.

Environmental precautions
Avoid discharge into drains, water courses or onto the ground.

7. Storage and handling requirements of chemicals during loading and unloading

7.1 Safety precautions when handling chemical products

7.1.1 Technical safety measures
No specific recommendations.

7.1.2 Environmental protection measures
Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Minimize dust generation and accumulation. Do not breathe dust.

7.1.3 Recommended safe handling and transportation advice
Should be handled in closed systems, if possible. Do not breathe dust. Observe good industrial hygiene practices. Use personal protection recommended in Section 8 of the SDS.

Local and general ventilation
Provide appropriate exhaust ventilation at places where dust is formed.

7.2 Chemical storage requirements

7.2.1 Terms and conditions for safe storage
Keep container tightly closed. Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).

7.2.2 Packaging
Store in original tightly closed container.

7.3 Safety measures and storage requirements at domestic use
The product is not intended for domestic use.

8. Equipment for monitoring exposure and personal protective equipment

8.1 Parameters of the working area that require monitoring

Occupational exposure limits
No exposure limits noted for ingredient(s).

8.2 Measures to ensure the content of harmful substances in the working area below the exposure level concentration

Appropriate engineering controls
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. If material is ground, cut, or used in any operation which may generate dusts, use appropriate local exhaust ventilation to keep exposures below the recommended exposure limits.

8.3 Worker personal protective equipment

8.3.1 General recommendations
Use personal protective equipment as required.
8.3.2 Respiratory protection
Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits.

8.3.3 Protective equipment

Eye/face protection
Chemical respirator with organic vapor cartridge, full facepiece, dust and mist filter.

Hand protection
Wear appropriate chemical resistant gloves.

Other
Use of an impervious apron is recommended.

Thermal hazards
Wear appropriate thermal protective clothing, when necessary.

8.3.4 Personal protection equipment in case of domestic use
The product is not intended for domestic use.

General hygiene considerations
Observe any medical surveillance requirements. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

10. Stability and reactivity

10.1 Chemical stability
Material is stable under normal conditions.

Hazardous decomposition products
No hazardous decomposition products are known.

10.2 Reactivity
The product is stable and non-reactive under normal conditions of use, storage and transport.

10.3 Conditions to avoid
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.

Possibility of hazardous reactions
No dangerous reaction known under conditions of normal use.

Incompatible materials
Acids. Chlorine. Fluorine. Incompatibility is based strictly upon potential theoretical reactions between chemicals and may not be specific to industrial application exposure.
11. Toxicological information

11.1 General exposure characteristics
Dusts may irritate the respiratory tract, skin and eyes.

11.2 Routes of exposure
Inhalation. Skin contact. Eye contact.

11.3 Affected/target organs, tissues and systems of humans
Specific target organ toxicity - single exposure
Not classified.

Specific target organ toxicity - repeated exposure
May cause damage to organs through prolonged or repeated exposure.

11.4 Information on health hazards in case of direct exposure to the product and its effect
Effect on upper respiratory tract irritation
Dust may irritate respiratory system. Inhalation of dusts may cause respiratory irritation.

Respiratory or skin sensitization
Hygiene Norm GN 2.2.5.1313-03. Executive No. 76 of 30 April 2003. Maximum allowable concentration (MAC) of harmful substances in the air of working zones, as amended
Not listed.

Respiratory sensitization
Not a respiratory sensitizer.

Skin sensitization
This product is not expected to cause skin sensitization.

Skin corrosion/irritation
Prolonged skin contact may cause temporary irritation.

Serious eye damage/eye irritation
Direct contact with eyes may cause temporary irritation.

Aspiration hazard
Not an aspiration hazard.

11.5 Information on long-term hazardous health effects
Carcinogenicity
In 1997, IARC (the International Agency for Research on Cancer) concluded that crystalline silica inhaled from occupational sources can cause lung cancer in humans. However in making the overall evaluation, IARC noted that "carcinogenicity was not detected in all industrial circumstances studied. Carcinogenicity may be dependent on inherent characteristics of the crystalline silica or on external factors affecting its biological activity or distribution of its polymorphs." (IARC Monographs on the evaluation of the carcinogenic risks of chemicals to humans, Silica, silicates dust and organic fibres, 1997, Vol. 68, IARC, Lyon, France.) In June 2003, SCOEL (the EU Scientific Committee on Occupational Exposure Limits) concluded that the main effect in humans of the inhalation of respirable crystalline silica dust is silicosis. "There is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis (and, apparently, not in employees without silicosis exposed to silica dust in quarries and in the ceramic industry). Therefore, preventing the onset of silicosis will also reduce the cancer risk..." (SCOEL SUM Doc 94-final, June 2003) According to the current state of the art, worker protection against silicosis can be consistently assured by respecting the existing regulatory occupational exposure limits. May cause cancer. Occupational exposure to respirable dust and respirable crystalline silica should be monitored and controlled.

IARC Monographs. Overall Evaluation of Carcinogenicity
Cristobalite (CAS 14464-46-1) 1 Carcinogenic to humans.
Quartz (SiO2) (CAS 14808-60-7) 1 Carcinogenic to humans.

Sanitary-Epidemiological Rules, 1.2.2353-08, Chemical substances, mixtures and products which are carcinogenic factors, 21 April 2008
Cristobalite (CAS 14464-46-1) Inhalation
Quartz (SiO2) (CAS 14808-60-7) Inhalation

Reproductive toxicity
This product is not expected to cause reproductive or developmental effects.

Developmental effects
Quartz (SiO2) 0

Developmental effects - EU category
Quartz (SiO2) 0

Embryotoxicity
Quartz (SiO2) 0

Reproductivity
Quartz (SiO2) 0

11.5 Information on long-term hazardous health effects
Mutagenicity
No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

Cumulativeness
Not available.

Chronic effects
May cause damage to organs through prolonged or repeated exposure. Prolonged exposure may cause chronic effects.
11.6 Acute toxicity data
Not known.

12. Environmental impact information

12.1 General description of the impact on the environment
The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

12.2 Routes of exposure to environment
Adverse effects may be caused by large spill in the environment as a result of accidents during transportation, storage, use, handling, depressurization of the container or/and the uncontrolled waste disposal.

12.3 The most important characteristics of the environmental impact

12.3.1 Hygienic standards
Not available.

12.3.2 Ecotoxicity
The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

12.3.3 Biomigration and transformation of the environment due to the biodegradation or other processes
Persistence and degradability
Bioaccumulative potential
No data available.

Mobility in soil
No data available.

Other adverse effects
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Recommendations for waste (residues) disposal

13.1 Safety precautions when handling the waste generated during use, storage, transportation
This product, in its present state, when discarded or disposed of, is not a hazardous waste according to Federal regulations (40 CFR 261.4 (b)(4)). Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste.

13.2 Information on the location and disposal methods, recycling or disposal of product waste, including packaging
Not available.

13.3 Recommendation on the waste disposal generated during its domestic use
Not available.

14. Transport information

ADR
Not regulated as dangerous goods.

IATA
Not regulated as dangerous goods.

IMDG
Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable.

15. National and international regulatory information

15.1 National legislation

15.1.1 Laws of the Russian Federation
On technical regulation.
On sanitary and epidemiological welfare of the population.
On Environmental Protection.
On Air Protection.

15.1.2 Information about the documentation, regulatory requirements for the protection of human health and environment
Sanitary-Epidemiological Rules 1.2.2353-08, Chemical substances, mixtures and products which are carcinogenic factors, 21 April 2008
Cristobalite (CAS 14464-46-1) Inhalation
Quartz (SiO2) (CAS 14808-60-7) Inhalation

Hygiene Norm GN 2.2.5.1313-03. Executive No. 76 of 30 April 2003. Maximum allowable concentration (MAC) of harmful substances in the air of working zones, as amended
Not listed.

15.2 International Conventions and Agreements
Stockholm Convention
Not applicable.
Rotterdam Convention
Not applicable.
Montreal Protocol
Not applicable.
Kyoto protocol
Not applicable.
Basel Convention
Not applicable.
